

## „El Zitheracchi´s „Deceleration For Senselessness“

Pure deceleration is what you are given while listening to the extremely tuneful and promising instrumental interpretations of the Bavarian Newcomer El Zitheracchi. This artist sees his mission in giving his fellow man a haven of rest within the struggles of life and hectic; he wishes to offer them „grounding“ thereby slowing down the speed of being

and allowing us the contemplation to the peace and serenity we need. Or if we want to say it differently: El Zitheracchi uses music as a key to an area, where only God is the centre. „*For the delight of our Lord - Bavarian Hallelujah*“, is the first album of his series „*Deceleration for Senselessness*“. We are invited to looking forward to his continuations. The zither has already been mentioned in the Bible as an instrument to praise and worship. And that is how we are sent to an approximately 20 minute long journey of really special sounds, we are taken by charming melodies engendering peace and quiet. They gently caress our soul, calm down restlessness and affectionately invite us to turn towards our Lord, be it accompanied by prayers or just while relaxing on the way home from work.
